

# SCIENCE TEACHERS

The environment and invasive species are an efficient way to study many science concepts (and related standards) under a broader theme. This workshop will feature many people willing to work with you and your students to utilize “No Child Left Inside” pedagogy. Ready to use resources will also be provided to help you meet standards challenges as well.

**Please join us for an Experiential Education Workshop:**

**Monday, June 2nd**  
**8:30 AM - 4:00 PM**  
**Niobrara State Park Lodge**  
**Niobrara, NE**

*Nebraska  
Wildlife  
Federation*

**Register by May 16th:**

Nebraska Wildlife Federation

PO Box 81437

Lincoln, NE 68501-1437

Call 402.477.1008 (leave message if necessary)

OR Email [dstahr@nebraskawildlife.org](mailto:dstahr@nebraskawildlife.org)

Space is limited

\$100 stipend provided

Workshop funded by Learn and Serve America grant by NDE via Niobrara High School Science

## **ANOTHER WORKSHOP?**

Summers are a cherished time for teachers. It is a time of recuperation and recharge; the antidote to the stressful school year. Asking you to commit a day to a workshop is asking a lot! BUT, your attendance will be worth your while.

You will have the opportunity to create contacts with resource agencies and peer groups that will support your efforts in the classroom. You will take home ready to use materials that will help make science instruction authentic to your students. Throw in some inspirational moments to remind you why we teach (other than dedication to poverty) and you have a day well spent. Great food and the \$100 stipend should clinch the deal for you.

## **Featured Topics / Agencies**

Invasive Species, Endangered Species, Nebraska Game and Parks, UNL Extension, Corps of Engineers, Niobrara Program, Nebraska Wildlife Federation, SPED applications, Learn and Serve America, Nebraska Department of Education
