

Bloodborne Pathogens and Standard Precautions Staff Training

“Bloodborne Pathogens in Schools”

QUIZ

1. True False When an individual is infected with BBPs, the pathogens live in their bloodstream and their body fluids.
2. True False Those infected can spread the disease to others, but only if symptoms are present.
3. True False HBV is far more infectious than HIV – and is more easily spread in the workplace.
4. True False Symptoms of HBV infection are often like the flu with headaches, nausea, fatigue and fever.
5. True False Currently, there are vaccines for HCV and HBV, but no vaccine for HIV.
6. True False When the immune system breaks down, AIDS develops in those with HIV.
7. True False The only way to detect HIV, HBV or HCV is through a blood test.
8. True False HBV and HCV can be spread through the air like the flu or a common cold.
9. True False BBPs are most often spread through sharing needles or unprotected sex.
10. True False If you are exposed to a bloodborne pathogen, you are automatically infected.
11. True False Children can be infected with hepatitis at birth.
12. True False HBV can live outside the body for only sixteen hours.
13. True False HIV can survive outside the body on environmental surfaces for at least one week – and still cause infection.
14. True False BBPs can enter your bloodstream through acne.
15. True False It is possible to be exposed to BBPs if you share a toothbrush with an infected person.
16. True False CDC guidelines recommend washing hands for at least 10 seconds.
17. True False To follow Standard Precautions, you assume that everyone is infected with a BBP and act accordingly.
18. True False If PPE is damaged, it cannot protect you from exposure to BBPs.
19. True False If you have to pick up potentially contaminated sharps like broken glass, wear disposable gloves when you touch the sharp objects.
20. True False If a handwashing facility is not available, use antiseptic towelettes or an alcohol-based gel sanitizer but wash your hands with soap and water as soon as possible.

Acknowledgement of Training: I viewed “Bloodborne Pathogen in Schools” and passed the comprehensive quiz at the conclusion of the training.
